

## WHY CLEAN YOUR DUCTS?

Because they get dirty!

A thoroughly cleaned HVAC system means:

- **Better air quality** – no more dust, dander, allergens, bugs, or even dead animals (yes, we do find those occasionally!)

AND

- **Lower energy usage** – Cleaner ducts can also improve the efficiency of your air conditioning system, allowing you to save energy and save money.

## HOW DO YOU KNOW IF YOUR DUCTS NEED TO BE CLEANED?

Do you see dust, dirt or debris behind your floor, wall, or ceiling registers? If you do, then your system needs to be cleaned!

Or just ask yourself – have you EVER gotten your HVAC system cleaned?

## WHO WE ARE

Alaka'i Mechanical is one of Hawai'i's top mechanical contractors. We've been in business for over 30 years, and our professionals are among the most skilled and experienced in the islands. We specialize in HVAC, plumbing systems, sheet metal and duct fabrication, as well as major design-build projects. From late-night repair calls to major design-build projects, we take what we do for you personally. Often that means going beyond what our clients expect of us. We wouldn't have it any other way.

## CLEANING YOUR HEATING, VENTILATION AND AIR CONDITIONING (HVAC) DUCTS ISN'T A LUXURY. IT'S A NECESSITY.

Dust and dirt accumulate daily in home and office AC systems. If you have pets, smoke, or have recently renovated, chances are your AC ducts are overflowing with dust particles. There may even be mold. Have you thought about all the stuff you're breathing in every time you run the AC?

Alaka'i Mechanical is now offering [Duct Cleaning Services](#) for both commercial and residential customers. With ASCS (Air System Cleaning Services) certified technicians, as well as the latest equipment, we know exactly what to do and how to do it.

## A THOROUGH HVAC DUCT SYSTEM CLEANING INCLUDES:

- |           |                           |
|-----------|---------------------------|
| Air ducts | Air plenum                |
| Coils     | Blower motor and assembly |
| Drain pan | Heat exchanger            |
| Registers | Air filter                |
| Grills    | Air cleaner               |

Don't be fooled by companies offering to just swish a broom around inside your ducts. Clean ducts mean nothing unless dirt and contaminants are removed from the ENTIRE system.
