

The Stability of Alaka'i

Alaka'i Mechanical is the premier mechanical contractor in Hawai'i. Our professionals are among the most skilled and experienced in the islands. But that only tells part of our story.

Our true story lies in the dedication and integrity we bring to every project. We encourage creativity and take pride in providing outstanding value. From late-night repair calls to major

design-build projects, we take what we do for you personally. Often that means going beyond what our clients expect of us. We wouldn't have it any other way.

One-Stop Re-Piping

One-Stop Re-Piping refers to the replacement of a building's plumbing system. Older buildings with an aging system may be ripe for plumbing problems.

Old pipes will inevitably deteriorate. Water pipes will corrode and start leaking. Waste pipes can crack as its walls thin. In some cases, build up can occur inside the pipes. They lose their drainage capacity,

causing drains to drain slower and eventually result in back-ups. This can be costly, not just to repair the plumbing, but in dealing with damages that occur from these plumbing failures and the insurance costs. The Alaka'i-Porter Team will provide you with a turnkey approach in taking care of all your needs - from re-piping to unit and common area protection, drywall, painting, cabinetry or whatever the need may be. We will leave the job in the same or better condition, with a new plumbing system that will last for years to come. And as Alaka'i, in all of our years serving Hawai'i, if there is ever a plumbing problem, you can count on us 24/7!

Who We Are

Alaka'i Mechanical has been one of Hawai'i's top mechanical contractors for the last 38 years. Our professionals are among the most skilled, experienced and dedicated in the islands. We specialize in plumbing, solar systems, HVAC, sheet metal and duct fabrication, commercial kitchens, and major design-build endeavors.
